

# FUN SCIENCE SIMULATIONS (5TH GRADE)

[Glacier Simulation TEKS 5.7B](#)

[Potential and Kinetic Energy Simulation TEKS 5.6A](#)

Make sure you open the bar graph to see the levels of potential, kinetic, and total energy shown in this simulation.

[Circuit Construction Kit TEKS 5.6B](#)

Build your own circuit, then test to see if it works.

[Bending Light Simulation TEKS 5.6C](#)

[Refraction Through Lens Simulation TEKS 5.6C](#)

[Sound Simulator TEKS 5.6A](#)

see how sound waves travel and how they can change.

[States of Matter Simulation TEKS 5.5A](#)

[Density Simulation TEKS 5.5A](#)

[Sunny Meadows Simulation Game TEKS 5.9 B & C](#)

**NOTE: In the explanation, it states that the rabbit is both a consumer and a producer. This is not true, as the rabbit is only a consumer.**

See how you score in this simple food chain game that includes fox, rabbits, and plants. This is a good complement to the Oh Deer! Game.
